

June 14, 1983

Rosa L. Agnew
3736 W. Nichols
Springfield, MO 65803

Dear Ms. Agnew:

On Thursday, June 9, 1983, this office received a report of a pollutant resembling laundry waste coming from your residence. A visual inspection by personnel from the City's Water Pollution Control Section confirmed that this waste was draining into the storm ditch in front of the house. This practice is perfectly acceptable for uncontaminated storm water or ground water; however, laundry waste must be disposed of through an approved waste disposal system or the sanitary sewer.

Please be advised that the discharge of pollutants is in violation of City, State and Federal Law, and a violation of City Health Ordinances. Steps should be taken to eliminate this discharge by placing it into an approved waste disposal system within (30) thirty days. This office maintains periodic surveillance throughout the corporate limits of the city and will inspect for compliance at the end of the thirty (30) day period and will take proper legal action if compliance is not met.

If you have any questions, please don't hesitate to call.

Yours truly,

Karen Chandler
Water Pollution Control Inspector II
Surveillance & Enforcement
